Challenge Description

We have a lot of data in our network of companies and want to get into the "Smart Data Business". Let's find out together what is possible. We have the following data, among others:

- 10 million CH Vacancies (since 2012)
- Several million professional data (e.g. Facebook)
- 650'000 job-seeking users per month on our job platforms (<https://www.jobchannel.ch/kanaele>)
- and much more

Task A:

Approximately 10 million detailed and structured data sets from the labour market meet "bright minds".
Turning Big Data into Smart Data!

Task suitable for:

- Math & Algorithm Cracks
 - Design & Gamification Cracks
 - Data Analysis & Statistics Cracks
- > Develops a "crunchy" product!

or

Task B:

"Pandora" for Jobs: Machine Learning in the job search - If the system is the better career advisor than you!

Task suitable for:

- Math & Algorithm Cracks
 - Design & Gamification Cracks
- > Develop a "sexy" product for the job search of the future!
