

Challenge for Sustainability Track

Let's imagine that products are designed in such a way that no waste is produced at all ...

Six project ideas qualified in the first Circular Boost, January to August 2021. See attached.

Ready to elaborate your own product idea? Check the requirements below:

- Propose a radical innovative circular product, closing cycles (ecological, technical, social, ...)
- Develop a concept for such a product
- Assure a maximum of diversity and equality in your team and in your target group.

Our coaches are ready to support you on:

- circularity aspects,
- material knowledge and science,
- product and process development,
- design thinking,
- business modelling,
- life cycle assessment and
- diversity and equality goals (see UN SDG#5 and UN SDG#10).

Get your idea ready at Hack Winterthur October 22 to 24, 2021.

And make that idea fly with our funding opportunities: [NTN Innovation Booster Applied Circular Sustainability](#), powered by Innosuisse.
